Yi Fei Chen

Software Developer

Email: yifeichen92@gmail.com
Github: github.com/yifeichen
Phone: (226)750-8292
Address: Longueuil, Quebec

Skills:

Programming Languages:

- Develop scalable, maintainable, object-oriented backend software using C++, Java, and Python.
- Design and develop real-time embedded software in C for ARM microcontrollers.
- Design, develop, and integrate RESTful APIs and backend services.
- Develop full-stack web applications using Angular, Grails/Groovy, and GORM, an ORM built on Hibernate, with SQL databases.
- Develop, debug, and deploy applications in Linux environments using shell scripting and system utilities.
- Develop and maintain automated testing frameworks to improve software quality and reliability
- Develop and maintain secure over-the-air (OTA) firmware update systems for internet-connected embedded devices.

Software Development Practices:

- Practice Agile/Scrum with Jira and Confluence for project tracking, sprint planning, and documentation.
- Use Git for version control and Jenkins for CI/CD pipelines.

Languages:
Fluent in English, French, and Chinese

Work Experience:

- Software Developer, Gigrow, Montreal QC, February 2020 – Present
  - Design, develop, and maintain a Python backend server on embedded devices and expose RESTful APIs for remote IoT monitoring.
  - Develop embedded applications in C for high-frequency sensor data acquisition, monitoring, and fault detection.
  - Maintain and enhance real-time embedded software running on ARM-based microcontrollers with JTAG-based debugging.
  - Develop unit tests and maintain automated build and continuous integration pipelines using Jenkins.
  - Collaborate with hardware engineers to integrate and validate new sensors and embedded hardware.

Internships:

- Software Developer, RSVP Tech, Waterloo, ON, September – December 2016
  - Debugged and resolved backend issues in Java applications.
  - Developed Android application prototypes for new product features.
- Software Developer, AppZero, Ottawa, ON, January – April 2016
  - Debugged and resolved issues in a C++ desktop application.
  - Implemented user interface enhancements to improve usability.

Education:

University of Waterloo

- Master of Applied Science in Electrical and Computer Engineering
  2017 - 2019
- Bachelor of Software Engineering, Honours Co-op
  2012 - 2017
